

## 160F Tenant Sustainable Purchasing CFL Purchases

Preferably, please contact LCB Associates to replace light bulbs, because they have made bulk purchases of low-mercury linear and compact fluorescent lights. If you need to replace light bulbs for desk lamps, floor lamps, etc., please pick from the following options:

1. Use LED task lights where possible, as they are the most energy efficient.
2. If you use CFL's, pick NEMA certified CFL's. **Please purchase from GE, Phillips or Osram Sylvania.** They have all voluntarily committed to NEMA's low-mercury standards of **5-6mg of mercury per bulb or less.**

Walmart.com sells GE CFL's:
